We should discuss application of this FEMA regulation at 44 CFR 60.3 **Flood plain management criteria for flood-prone areas** pasted below. Our Eco Risk person identified it in her comments submitted to the Program.

(d) When the Federal Insurance Administrator has provided a notice of final base flood elevations within Zones A1-30 and/or AE on the community's FIRM and, if appropriate, has designated AO zones, AH zones, A99 zones, and A zones on the community's FIRM, and has provided data from which the community shall designate its regulatory floodway, the community shall:

- (1) Meet the requirements of paragraphs (c) (1) through (14) of this section;
- (2) Select and adopt a regulatory floodway based on the principle that the area chosen for the regulatory floodway must be designed to carry the waters of the base flood, without increasing the water surface elevation of that flood more than one foot at any point;
- (3) Prohibit encroachments, including fill, new construction, substantial improvements, and other development within the adopted regulatory floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that the proposed encroachment would not result in any increase in flood levels within the community during the occurrence of the base flood discharge;

See especially the last comment, on wetlands/lowlands.

Is there something I should do to go ahead and grab the EPA wetlands mitigations regs so we can include in our comment to the program?

Sorry for taking so long! I forgot that I hadn't finished with the last comment. Here are my thoughts in comments.

I'm going to talk to David about Sharon's last comment (on wetlands), and will follow up about that.

**Importance:** High

Hi Martha,

Attached is the document and the comments in question for your review are highlighted in several comment fields (should be in red).

Please redline/strikeout any/all changes and send back to me and Cathy.

Thanks very much for your help with this.

Carl
